

# Operation Cyberbully

## Classified and Urgent

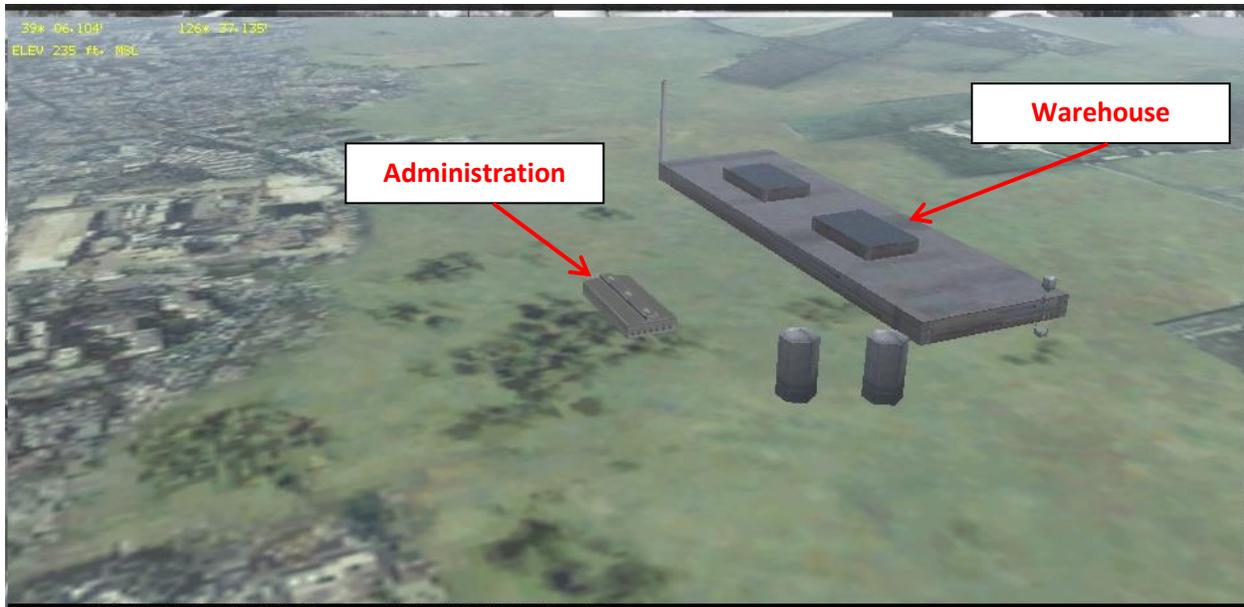

North Korea's recent cyberattacks on U.S. based companies has become a threat to national security. The NSA has tracked recent cyberattacks on U.S. based companies to North Korea. The White House has directed the CIA and the Pentagon to take any measures necessary to eliminate the threat of future cyberattacks. The CIA has identified three cyber-hacking locations in North Korea: #1 east of Cheonan, #2 north of Suktam-Ni, and #3 at Sambae-Ri. The administrative building at the 8 Feb Synth Fiber complex is the hub of the operation and must be destroyed immediately. The three warehouses house scores of computers and highly skilled hackers.
